

# Maximize Value. Minimize Waste. Take Control of Your AWS Cloud Spend.

## AWS Cloud Cost Optimization Services

Take control of your AWS cloud spend with NexusTek's **Cloud Cost Optimization Services**. We help you reduce costs, improve efficiency, and maximize long-term value from your AWS investment by providing industry-proven analysis, ROI-backed recommendations, and expert remediation services. Purpose-built for mid-size enterprises managing hybrid environments or scaling AWS adoption across business units, our services help organizations uncover immediate, sustainable savings through a structured methodology leveraging financial analysis and AWS-native tools.

### WHO IT'S FOR

#### CIOs & CTOs

Seeking predictable cloud costs and stronger ROI.

#### Finance & Procurement Teams

Requiring transparency, forecasting, and accountability.

#### Cloud Operations & DevOps Teams

Managing cloud infrastructure and optimization tasks.

#### Compliance & Governance Leaders

Ensuring financial controls are in place.

#### Mid-Size Enterprises

Scaling AWS adoption while controlling costs across business units.

### KEY BENEFITS

#### Achieve 20–30% Overall Cloud Spend Reduction

Through proven cost management strategies tailored for AWS.

#### Gain 40–60% Savings on Overprovisioned EC2 and RDS

Utilize right-sizing and Compute Optimizer insights.

#### Reduce Storage Costs by Up to 30%

Optimize S3/EBS tiers and eliminate unused volumes.

#### Improve Efficiency with Dev/Test Automation

Save 10–20% by scheduling workloads around business hours.

#### Leverage Long-Term Discounts

Maximize Reserved Instances, Savings Plans, and spot instance strategies.

#### ROI-Justified Recommendations

Receive clear cost-benefit modeling and break-even timelines.

#### Accelerate Execution of Cost Savings

Leverage NexusTek's expert-led implementation services.

#### Establish Sustainable Cost Governance

Support tagging enforcement, anomaly detection, and FinOps practices.

## HOW IT WORKS

We begin with a comprehensive discovery and usage analysis with AWS-native tools such as **AWS Cost Explorer, Trusted Advisor, Compute Optimizer, CloudWatch**, and **AWS Billing Console**. Our team identifies key inefficiencies, such as over-provisioned EC2 instances, idle EBS volumes, underutilized RDS, inefficient storage tiers (e.g., S3 Standard vs. S3 Infrequent Access), and untagged resources that hinder cost visibility.

NexusTek then translates these findings into a strategic cost optimization roadmap, including:

- **Tactical quick wins:** Instance right-sizing, automated shutdown of dev/test workloads, storage tiering
- **Governance recommendations:** Budget enforcement, tagging standards, and account segmentation
- **ROI model:** Baseline spend, projected savings, cost of remediation, and time to value

After the assessment, NexusTek provides execution support to implement prioritized recommendations, from modifying autoscaling policies to applying lifecycle rules and cost allocation tags. For customers pursuing sustained savings, we offer **Managed FinOps Services** that include anomaly detection, budget guardrails, and quarterly optimization reviews.

## FEATURES

### Comprehensive Cloud Spend Discovery & Analysis

Deep analysis of AWS usage patterns, billing trends, and workload behavior.

### Executive-Level Strategic Recommendations & ROI Modeling

Prioritized optimization plan with financial projections and business justification.

### Hands-On Remediation Execution Support

Right-sizing EC2/RDS, storage tier optimization, tagging enforcement, automation.

### AWS-Native Tool Integration

Leverages AWS Cost Explorer, Trusted Advisor, Compute Optimizer, CloudWatch, and Budgets.

### Financial & Operational Governance Enhancements

Implementation of cost controls, tagging policies, and savings plan recommendations.

### Executive Reporting & ROI Dashboards

Deliverables include summaries, actionable insights, and savings projections.

### Optional Managed FinOps Services

Continuous optimization, budget guardrails, and executive stakeholder alignment.
