

Seamless Hybrid Cloud Management – 24/7/365 Performance, Security, and Cost- Efficiency for AWS Workloads

AWS Hybrid Cloud Managed Services

Operate with confidence in the cloud. NexusTek's **AWS Hybrid Cloud Managed Services** provide 24/7/365 full-stack operational support. Whether you run production workloads in AWS, rely on legacy applications in a private cloud, or maintain core systems on-premises, our service ensures continuous availability, cost efficiency, and operational excellence. NexusTek's certified experts keep your infrastructure secure, optimized, and compliant—so your internal IT teams can stay focused on innovation and growth.

WHO IT'S FOR

IT Leaders & CIOs

Focused on delivering secure, high-performing operations at scale.

Cloud & Infrastructure Teams

Supporting AWS, private, and on-prem infrastructure across the enterprise.

Security & Compliance Officers

Responsible for cloud risk management and audit readiness.

Mid-Size Enterprises

Seeking managed services that support hybrid operations without overextending internal teams.

Business Executives

Prioritizing cost reduction, uptime, and agile IT operations.

KEY BENEFITS

Always-On Operations

Minimize downtime with proactive detection, resolution, and escalation procedures.

Extend Your IT Team

Access AWS-skilled professionals without the burden of recruitment, training, or retention.

Maximize AWS Investments

Optimize resource utilization and spending through continuous tuning and cost controls.

Strengthen Your Security Posture

Maintain alignment with AWS Well-Architected principles and regulatory frameworks.

Accelerate Business Agility

Reduce operational complexity so your team can focus on digital transformation initiatives.

Drive Transparency & Control

SLAs, reporting, and regular service reviews keep you informed and in control.

HOW IT WORKS

At the core of NexusTek's AWS Hybrid Cloud Managed Services is our Governance-Ready Operations Model, which enforces AWS best practices across identity, access, security, policy management, automation, and cost optimization. We leverage **AWS Systems Manager, CloudWatch, Config, Trusted Advisor**, and **Security Hub** to maintain continuous visibility, control, and compliance.

Our service follows ITIL-aligned frameworks for incident, change, and problem management. We actively participate in your CAB (Change Advisory Board) meetings, manage IaC-based deployments

(with **Terraform** and **AWS CloudFormation**), and document standardized operational runbooks for long-term continuity.

With **Silver, Gold, and Platinum service tiers**, you can choose the right mix of L1-L4 support, from basic monitoring to strategic optimization. Services include patch management, backup validation, anomaly detection, cost governance, security controls, and AWS-native tooling integration.

Whether you are cloud-native, hybrid, or mid-transition, NexusTek ensures resilient, cost-effective, and compliant operations across your entire estate.

FEATURES

24/7/365 Monitoring & Incident Management

Real-time visibility and rapid response across AWS, private cloud, and on-prem systems.

Tiered Service Models (Silver, Gold, Platinum)

Scalable support ranging from L1 triage to L4 cloud optimization and strategic planning.

AWS-Native Tooling Integration

Continuous health and performance checks using AWS CloudWatch, Systems Manager, Security Hub, and Trusted Advisor.

Operational Best Practices

ITIL-aligned incident, change, and problem management processes with CAB participation and knowledge sharing.

Workload Optimization & Cost Governance

Optimization driven by AWS Cost Explorer, Compute Optimizer, Savings Plans, and tagging policies.

Patch & Backup Management

Lifecycle management of updates, snapshot validation, and compliance assurance.

Security & Compliance Management

Enforcement of identity controls, CIS benchmarks, encryption policies, and audit readiness via AWS Config.

Expert Advisory Access

Tap into NexusTek's AWS-certified engineers for guidance on scaling, refactoring, or operational transformation.
