

NexusTek Hybrid Cloud Services

Maximize Value. Minimize Waste. Take Control of Your Azure Cloud Costs.

Cloud Cost Optimization Services

Take control of your Azure cloud spend with NexusTek's **Cloud Cost Optimization Services**. We combine industry-proven analysis, ROI-backed recommendations, and expert remediation services to help you reduce costs, improve efficiency, and maximize long-term value from your Azure investments.

WHO IT'S FOR

IT and Cloud Leaders

CIOs, CTOs, and Cloud Directors seeking financial control and operational efficiency.

Finance & Procurement Teams

Responsible for cloud cost management and accountability.

Cloud Operations Teams

Managing Azure environments.

Security & Compliance Officers

Ensuring cost governance aligns with organizational policies.

Mid-Size Enterprises

Seeking to maximize ROI from their Azure investment.

KEY BENEFITS

Unlock 20-30% Overall Cloud Spend Savings

Via industry-proven cost optimization methods and NexusTek expertise.

Achieve 40-60% Savings on Overprovisioned Compute

Through right-sizing and autoscaling of Azure workloads.

Reduce Storage Costs by Up to 30%

By optimizing storage tiers and cleaning up unused resources.

Gain Up to 15% Savings Through Automation

By automating shutdown schedules for non-production environments.

Leverage Long-Term Savings with Azure Commitment-Based Discounts

Including Reserved Instances and Savings Plans.

Detailed ROI Models

Quantify financial impact, break-even timelines, and ongoing value realization.

Accelerate Quick Wins with Prioritized Remediation Execution

Fast-track cost reduction with expert-led implementation services.

Establish Sustainable Cost Governance

With operational policies, continuous monitoring, and process improvements.

Maintain Financial Transparency and Executive Confidence

Through ongoing reporting, budget control, and cost allocation visibility.

HOW IT WORKS

NexusTek's **Cloud Cost Optimization Services** help Azure customers unlock immediate and sustainable cost savings through a **proven assessment, analysis, and remediation methodology**. By combining **industry-backed best practices** with **ROI-driven financial modeling**, our services deliver actionable insights and measurable business outcomes.

We start with a **comprehensive discovery and usage analysis**, leveraging Azure-native tools such as **Azure Cost Management + Billing**, **Azure Advisor**, and **Azure Monitor** to evaluate your current cloud estate. Our team identifies key cost inefficiencies—such as overprovisioned compute, idle resources, improper storage tiering, and unused services—areas where industry research consistently shows **20-30% of cloud spend is wasted**.

NexusTek quantifies these findings in a **strategic cost optimization roadmap**, which includes:

- Tactical **quick wins** (e.g., right-sizing, automation, and storage optimization)
- Strategic **governance improvements** (e.g., policy enforcement, budget controls, and operational process updates)
- A **comprehensive ROI model** detailing baseline spend, projected monthly and annual savings, remediation costs, and break-even timelines

Following the delivery of your ROI-backed recommendations, NexusTek provides **execution support** to implement the prioritized remediations. We help right-size resources, automate scaling, adjust storage tiers, and implement Azure cost governance policies.

For customers seeking **ongoing optimization**, NexusTek offers **managed cost governance services**, including continuous monitoring, anomaly detection, and process improvement to sustain savings over time.

FEATURES

Comprehensive Cloud Spend Discovery & Analysis

In-depth evaluation of your Azure estate using Azure-native tools and expert analysis.

Executive-Level Strategic Recommendations & ROI Modeling

Prioritized savings opportunities with detailed financial impact analysis and ROI justification.

Remediation Project Execution Support

Hands-on support to implement right-sizing, automation, storage optimization, and governance improvements.

Azure-Native Tooling Integration

Leverages Azure Cost Management + Billing, Azure Advisor, Azure Monitor, and Defender for Cloud.

Operational & Financial Governance Enhancements

Implementation of cost policies, budget alerts, and operational improvements.

Executive Reporting & ROI Dashboard

Deliverables include executive summaries, detailed findings, and ROI projections.

Optional Ongoing Cost Governance Services

Continuous monitoring and optimization to sustain cost savings and financial control.
