

NexusTek Hybrid Cloud Services

Secure Virtual Desktops at Cloud Speed— Delivered by NexusTek.

Azure Virtual Desktop Deployment Services

Empower your workforce with secure, scalable, and efficient virtual desktops—anywhere, anytime. NexusTek's **Azure Virtual Desktop (AVD) Deployment Services** provide a turnkey solution for mid-size organizations looking to modernize IT operations and embrace hybrid work. This fixed-price engagement covers up to 100 users and is **eligible for Microsoft Azure Consumption Commitment (MACC)** credits.

Fixed Price: \$15,000 (up to 100 users)

MACC-Eligible: Apply your Microsoft Azure committed spend

WHO IT'S FOR

-  **CIOs & CTOs**
Driving secure hybrid work strategies across locations.
-  **IT Directors**
Simplifying VDI management while scaling operations securely.
-  **Security Leaders**
Enforcing least-privilege access and data protection for remote users.
-  **Line-of-Business Managers**
Supporting elastic workforces and contractor onboarding.
-  **Mid-Size Enterprises**
Accelerating secure remote work adoption without legacy VDI complexity.

KEY BENEFITS

Speed to Value

Reduce implementation time with pre-built templates and automation.

Workforce Flexibility

Empower hybrid and remote workers with consistent virtual desktop experiences.

Operational Excellence

Improve manageability, monitoring, and performance with Azure-native tools.

Security by Design

Ensure Zero Trust architecture with encrypted profiles, secure access policies, and Microsoft Defender integration.

Scalable Architecture

Expand environments on demand without rework or downtime.

IT Simplicity

Reduce complexity with centralized policy and identity management.

Procurement Simplicity

Easily acquire this service using existing MACC budgets.

HOW IT WORKS

As a leading Microsoft Partner with deep Azure proficiency, NexusTek delivers turnkey AVD solutions tailored to the needs of mid-sized enterprises. Our solutions accelerate time-to-value while ensuring long-term scalability, security, and support.

We provide a full-stack deployment experience—from infrastructure provisioning and FSLogix profile management to role-based access controls and AVD session host pools. Every engagement starts with discovery workshops and ends with a production-ready, scalable, and monitored AVD environment.

Our cloud engineers leverage Microsoft best practices and NexusTek's proprietary templates to deliver AVD solutions that are:

- Rapidly deployed
- Securely architected
- Easily extensible across users, workloads, and regions

FEATURES

Rapid Deployment

Deploy a complete AVD environment in hours, not days.

MACC-Eligible Procurement

Unlock value using your existing MACC credits.

Dynamic Scaling

Scale up or out to meet business demands—supporting development, testing, and production environments.

Landing Zone Setup

Build a secure, Azure-native foundation including VNets, NSGs, session hosts, app groups, and key vault integration.

Secure FSLogix Profiles

Encrypted profile containers with KMS integration for seamless and secure user experiences.

Integrated Monitoring

Leverage Azure Monitor and Log Analytics to gain visibility across session health, performance, and utilization.

Multi-Region Support

Configure for centralized or distributed team structures with high availability.

Custom Image Management

Deploy session hosts with golden images or custom line-of-business apps.

Flexible Access

Enable secure remote access through Entra ID, MFA, and conditional access policies.

Optimization Guidance

Align with Microsoft's Well-Architected Framework for cost, performance, and security optimization.
