NexusTek Private Cloud:
YOUR CLOUD,
YOUR WAY

Public cloud platforms have revolutionized how businesses consume technology, offering push-button access and on-demand resources that fuel innovation in every industry. But the one-size-fits-all approach of public cloud can fall short for organizations with specialized compliance, security, and performance needs.

NexusTek Private Cloud combines the flexibility and ease of use of public cloud with granular customizability and control—all with unmatched service.

New Workloads, New Pressures in the AI Era

AI, data-hungry workloads, and rising costs are changing how organizations approach the cloud. As technology evolves, private cloud is becoming a key part of secure, modern infrastructure. However, building and scaling it in-house can be complex and costly. That's why more organizations are turning to expert service providers to simplify and accelerate their private cloud journey.

CAN YOUR CLOUD DO THIS?

- **Enable fine-grained control and configurations**
- **Meet stringent security and privacy standards**
- **Reduce expenses with transparent billing**
- **Facilitate direct integrations with existing systems**

NexusTek Private Cloud: Built for Your Requirements
THE FOUNDATION TO INNOVATE AND OPERATE WITH CONFIDENCE.

Financial Predictability
Transparent, fixed-cost billing simplifies budget management and eliminates unexpected expenses

Hybrid Cloud Integration
Seamless interoperability connects public clouds, on-premises infrastructure, and legacy systems

Security and Compliance
Tier 4 or 5 rated data centers ensure services remain fault-tolerant, reliable, and available

AI-Ready Infrastructure
Available GPU support allows private AI workloads to be run securely without sacrificing performance or compliance

Cloud Migration
Smooth and easy transition processes limit disruptions, with a 100% migration success rate

Backup and Disaster Recovery
99.99% uptime SLA improves business continuity while keeping data and operations secure

GET THE PRIVATE CLOUD YOU NEED

NexusTek Private Cloud offerings are built to meet unique business needs, supporting a wide variety of IT strategies and regulatory environments.

NexusTek Virtual Private Cloud

A multi-tenant private cloud environment that isolates each tenant on shared infrastructure. Each organization's data, workloads, and resources are fully segregated, delivering the core capabilities of private clouds with the guarantee of dedicated virtual resources.

NexusTek Dedicated Private Cloud

A single-tenant private cloud environment with infrastructure dedicated exclusively to one organization. Ideal for businesses managing highly regulated workloads or stringent security requirements that prohibit the presence of co-tenants.

Your Ticket to Efficient, Effective Private Cloud

As a trusted technology advisor, NexusTek serves the market with modern solutions to help grow businesses and mitigate risks. NexusTek's expert teams become an extension of our customer's IT staff, providing a level of dedicated, knowledgeable service that other providers can't match.

Optimized Costs and Resources

Purpose-built solutions with seamless operations to reduce load on in-house teams

Simplified Compliance

Secure cloud environments with granular control of data and industry-specific standards

Accelerated Time to Value

Experienced experts to resolve possible inefficiencies and minimize business impacts

Strengthen Your Cloud Strategy

NexusTek offers more than just cloud expertise, providing bundled services and solutions tailored to unique client needs. Discover how NexusTek Private Cloud can elevate your operational excellence and support your unique business requirements. Contact us today at **info@nexustek.com**.
