NexusTek MDR

## Full Lifecycle Threat Management and Remediation

For organizations with lean IT teams or limited in-house security expertise, defending against emerging risks can feel overwhelming—burdened by too many tools, too many alerts, and not enough time or resources to respond effectively.

NexusTek Managed Detection and Response (MDR) changes the equation with a fully managed service that improves visibility, enhances resilience, and enables rapid threat remediation—without adding strain on internal teams.

Conventional Approaches Are No Longer Enough

Today's cyber threats are sophisticated, relentless, and evolving at unprecedented speed. Organizations attempting to keep pace on their own face an uphill battle, while traditional service models often fall short—offering narrow or limited response capabilities.

NexusTek MDR delivers a smarter, more proactive path forward. Our end-to-end service combines comprehensive detection, real-time remediation, and continuous protection—backed by a team of 24/7/365 security professionals who act as an extension of your team.

Managed Detection — Compromise, Detection, Remediation, Response
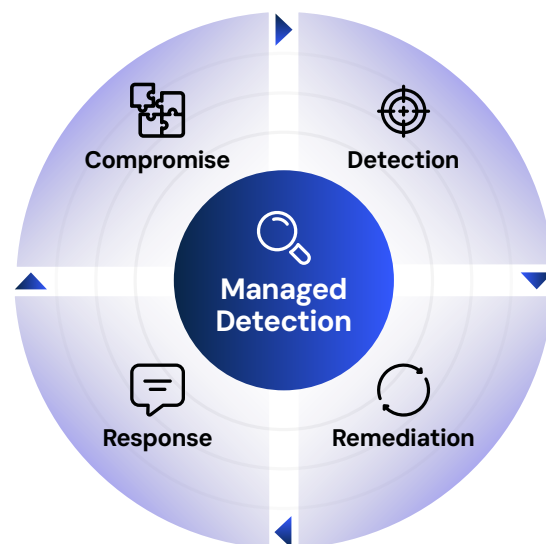

A Single, Unified Service

NexusTek is your source for expert-led remediation, support, and response—delivering a robust MDR solution that brings everything you need together in one place.

Rapid Response
Remediates threats with automated playbooks and hands-on analyst support

Guided Remediation
Develops custom detection rules and configurations based on your specific needs

Actionable Intel
Leverages intelligence feeds and proactively hunts to combat stealthy threats

Threat Containment
Contains security incidents, isolates infected systems, and blocks malicious activity

In-depth Monitoring
Analyzes data, monitors endpoints and network traffic, and identifies misconfigurations

Comprehensive Reporting
Conducts regular security posture reviews and furnishes incident reports

Comprehensive Coverage

Unlike other service offerings that provide partial coverage or lack robust response capabilities, NexusTek MDR protects your entire digital estate across the full threat lifecycle. From detection to resolution, we deliver the right blend of technologies and expertise to strengthen resilience—mitigating risk across networks, endpoints, custom applications, and clouds.

WHAT'S INCLUDED

- 24/7 Security Monitoring
- Vulnerability Alerting
- Incident Validation and Triage
- Security Information and Event Management (SIEM)
- Incident Response
- Endpoint Detection and Response
- Threat Hunting
- Network Detection and Response
- Threat Intelligence
- Managed Containment
- Log Management and Retention
- Hot Storage 13 Months
- Security Reviews and Reporting

Your Trusted Partner

For over two decades, organizations have relied on NexusTek to safeguard their critical environments. Backed by proven processes and an elite team of cybersecurity experts, we deliver deep domain expertise and specialized capabilities to minimize risk. Our commitment to excellence is recognized across the industry—and reflected in our 99% customer satisfaction.

20+ YEARS	CERTIFIED	EXCEPTIONAL
of cybersecurity excellence	industry experts	customer satisfaction

Improve threat detection and response.
